

Food Village

HOW DOES THE LUNCH SERVICE WORK?

You can pre-order Food Village meals for any number of days—daily or weekly. With over 200 menu items, set your pre-orders through the app dashboard. Choose your break, select items from meals, snacks, & drinks. Orders are charged from the wallet within your app at midnight the day before delivery. All pre-orders must be placed at least one day in advance. Instant purchase is available for same day orders.

YOUR SCHOOL LUNCH SERVICE

Welcome to new 1st Year Students

Food Village is the school canteen providing over 200 lunch options to students everyday. Prices start from €0.49 to €4.99. Food Village chefs prepare all meal orders, & our in school team heats these meals onsite, ensuring they're served at the perfect temperature.

Over 200 meals, snacks & drinks to choose from.

Enjoy hot meals at school. Prepared fresh by our chefs.

1ST YEAR REGISTRATION

Dear Parents/Guardians,

Food Village meal are prepared off site and delivered into school each morning. All ordering is done via the Food Village mobile ordering app. All orders are paid for via the app. Each student receives a key tag which they use for collection of their orders each day.

HOW DOES IT WORK?

#1 App Ordering: Download the mobile app and register a student account to place orders.

#2 Pre-Ordering: Meals are required to be ordered in advance so our chefs have time to prepare the meals and deliver into school. All orders are paid for via the app. No cash payments are available.

#3 Meal Collection: Students use a key tag to collect meals in school. This Keytag must be linked to the student account in the ordering app. We will give every 1st year a keytag.

#4 Parental Linking: After a student account is created, you can create a parent account which will link and parents can manage the wallet section, including setting a budget.

#5 Orientation: During the first few days at school our onsite lunch operative will introduce themselves to the students and show them how to collect their orders.

This is the collection key tag which needs to be attached to the app
